

The pictures below are of a cash machine in mainland Europe which has been doctored to copy cash cards and record the PIN which is entered. So far nothing like this has appeared her, but please be very careful when using machines which are not absolutely normal.

We have had several instances of the card slot being tampered with (the so-called Lebanese loop), enabling a thief to retain the card.

1- ATM machine as usual ?

2- Is there an additional slot ?

FALSE slot Fixed to the original card slot. (Same color and sticker). Contains additional card reader to copy your card information ..and duplicate your card

3- A monitor and pamphlet holder at the side...nothing wrong

4- wait Is it really a pamphlet holder

The side of box ,
facing the ATM
screen has a
reflective glassy hole
....thats a CAMERA !

5-False pamphlet box affixed to the ATM cubicle side

The micro camera at the side can view the KEYPAD and also the monitor to send wireless picture up to 200metres.

6-Inside the "pamphlet box"

Camera positioned at correct angle to view keypad and monitor

Camera Battery;

Transmission Antenna
